forensic interventions for therapy and rehabilitation case studies and analysis provides an up to date overview of the latest therapeutic ideas being used for forensic service users and prisoners in both custodial and community settings the field of forensic work is increasingly being recognised for its importance both in terms of the value of the work in reducing reoffending and in terms of the salience given to it by the media the public and politically this text reflects current policy and practice and furthermore considers the therapeutic encounter from a broad perspective which incorporates individual group and systemic interventions forensic interventions for therapy and rehabilitation includes chapters on a range of therapeutic models issues pertinent to specific groups of people with criminal convictions and discussion on the various contexts in which interventions take place forensic interventions for therapy and rehabilitation is essential reading for all students of forensic or clinical psychology as well as practitioners in the field

africa s international relations have often been defined and oriented by the dominant international and geopolitical agendas of the day in the aftermath of colonialism the cold war became a dominant paradigm that defined the nature of the continent s relationship with the rest of the world the contemporary forces of globalization are now exerting an undue influence and impact upon africa s international relations increasingly the african continent is emerging as a vocal and in some respects an influential actor in international relations there is a paucity of analysis and research on this emerging trend this timely book proposes to fill this analytical gap by engaging with a wide range of issues with chapters written by experts on a variety of themes the emerging political prominence of the african continent on the world stage is predicated on an evolving internal process of continental integration in particular there are normative and policy efforts to revive the spirit of pan africanism the 21st century is witnessing the evolution of pan africanism notably through the constitution and establishment of the african union au given the fact that there is a dearth of analysis on this phenomemon this volume will also interrogate the notion of pan africanism through various lenses notably peace and security development the environment and trade the volume will also engage with the emerging role of the au as an international actor e g with regard to its role in the reform of the united nations security council climate change the international criminal court icc the treaty establishing africa as a nuclear free zone internally displaced persons the millennium development goals mdgs international trade the environment public health issues security and development issues this book will assess how the au s role as an international actor is complicated by the difficulty of promoting consensus among african states and then maintaining that consensus in the face of often divergent national interests this book will in part assess the role of the au in articulating collective and joint policies and in making interventions in international decision and policy making circles the handbook will also assess the role of african social movements and their relationship with global actors the role of african citizens in ameliorating their own conditions is often underplayed in the international relations discourse and this volume will seek to redress this oversight throughout the book the various chapters will also assess the role that these citizen linkages have contributed towards continental integration and in confronting the challenges of globalization

africa has experienced a number of territorial disputes over land and maritime boundaries due in part to its colonial and post colonial history this book explores the legal political and historical nature of disputes over territory in the african continent and critiques the content and application of contemporary international law to the resolution of african territorial and border disputes drawing on central concepts of public international law such as sovereignty and jurisdiction and socio political concepts such as colonialism ethnicity nationality and self determination this book interrogates the intimate connection that peoples and nations have to territory and the severe disputes these may lead to gbenga oduntan identifies the major principles of law at play in relation to territorial and boundary disputes and argues that the predominant use of foreign based adjudicatory mechanisms in attempting to deal with african boundary disputes alienates those institutions and mechanisms from african people and can contribute to the recurrence of conflicts and disputes in and among african territories he suggests that the understanding and application of multidisciplinary dispute resolution mechanisms and strategies can allow for a more holistic and effective treatment of boundary disputes as an in depth study into the legal socio political and anthropological mechanisms involved in the understanding of territorial boundaries and a unique synthesis of an african jurisprudence of international boundaries law this book will be of great use and interest to students researchers and practitioners in african and public international law international relations and decision makers in need of better understanding the settlement of disputes over territorial boundaries in both africa and the wider world

this volume addresses the marked influence that african borders and boundaries whether real or imaginary have on the lives of those inhabiting the borderland how do political and symbolic borders take concrete shape and how do they bear on daily life conversely how does life in the borderland shape the borders that characterize it the book recognizes borderlands as shifting places times or domains where competing discourses and regimes of power overlap characterized by overt contradiction and paradox they are often imagined at the outside yet they pertain to and define the center the collected case studies challenge the assumption that states and anonymized institutions are the principal actors in border making instead they argue for an actor oriented perspective while drawing attention to the physicality of the borderscape series african studies afrikanische studien vol 40

bringing together interconnected discussions to make explicit the complexity of the arctic region this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national regional and international level one of the intrinsic features of the region is the difficulty in the determination of boundaries responsibilities and interests against this background sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and at the same time influence national approaches to basic rights and organizational schemes regarding the protection of indigenous peoples and inhabitants of the region this perspective lays the ground for further discussion revolving around the main clusters of governance focusing on the arctic council and the european union with the particular roles and interest of arctic and non arctic states and the impact on indigenous populations environment including the relevance of national regulatory schemes and the intertwinement with concerns related to energy or migration strategy concentrating in

geopolitical realities and challenges analysed from different perspectives and focusing on different actors and covering security and climate change related challenges this collection provides an avenue for parallel and converging research of complex realities from different disciplines through the expertise of scholars from different latitudes

anthropologists have long looked to forager cultivator cultures for insights into human lifeways but they have often not been attentive enough to locals horizons of concern and to the enormous disparity in population size between these groups and other societies us relatives explores how scalar blindness skews our understanding of these cultures and the debates they inspire drawing on her long term research with a community of south asian foragers nurit bird david provides a scale sensitive ethnography of these people as she encountered them in the late 1970s and reflects on the intellectual journey that led her to new understandings of their lifeways and horizons she elaborates on indigenous modes of being many that have been eclipsed by scale blind anthropology which generally uses its large scale conceptual language of persons relations and ethnic groups for even tiny communities through the idea of pluripresence bird david reveals a mode of plural life that encompasses a diversity of humans and nonhumans through notions of kinship and shared life she argues that this mode of belonging subverts the modern ontological touchstone of imagined communities rooted not in sameness among dispersed strangers but in intimacy among relatives of infinite diversity

epigenetics and systems biology highlights the need for collaboration between experiments and theoretical modeling that is required for successful application of systems biology in epigenetics studies this book breaks down the obstacles which exist between systems biology and epigenetics researchers due to information barriers and segmented research giving real life examples of successful combinations of systems biology and epigenetics experiments each section covers one type of modeling and one set of epigenetic questions on which said models have been successfully applied in addition the book highlights how modeling and systems biology relate to studies of rna dna and genome instability mechanisms of dna damage signaling and repair and the effect of the environment on genome stability presents original research in a wider perspective to reveal potential for synergies between the two fields of study provides the latest experiments in primary literature for the modeling audience includes chapters written by experts in systems biology and epigenetics who have vast experience studying clinical applications
