it is now becoming recognized in the measurement community that it
is as important to communicate the uncertainty related to a specific
measurement as it is to report the measurement itself without
knowing the uncertainty it is impossible for the users of the result
to know what confidence can be placed in it it is also impossible to
assess the comparability of different measurements of the same
parameter this volume collects 20 outstanding papers on the topic
mostly published from 1999 2002 in the journal accreditation and
quality assurance they provide the rationale for why it is important
to evaluate and report the uncertainty of a result in a consistent

manner they also describe the concept of uncertainty the methodology for evaluating uncertainty and the advantages of using suitable reference materials finally the benefits to both the analytical laboratory and the user of the results are considered
